INVITATION TO THE IFF FLOORBALL DEVELOPMENT PROGRAM SEMINAR

Dear Ms./Mr. President,

The interest among the IFF member associations has steadily continued to be on a high level towards the need and usefulness of the IFF Floorball Development Programme Seminars held all over the world. Since the start of the Programme in 2005, the IFF Development Function has held seminars or related workshops in twenty countries. To continue the process for the year 2014 the IFF Development function together with the Austrian Floorball Association (ÖFBV) has decided to organise a separate session of the Floorball Development Programme for the member associations in Central Europe in 2014, in order to support and develop the organisation and the operational activities of our members countries in Innsbruck, Austria.

The next Floorball Development Programme Seminar will be organised by the IFF, in co-operation with Austrian Floorball Association (ÖFBV). The seminar will be held at the Austrian Olympia Center in the city of Innsbruck, which is situated in the south-west parts of Austria, **from Saturday the 7th to Monday the 9nd of June 2014.**

The seminar is built on the "Train the Trainer"-approach, including two different blocks, one for Coaching and one for Refereeing. These two different blocks are all aiming to give additional knowledge and support in these fields to the participating federations and persons interested in Floorball. A participant can only take part in one block during the seminar.

The seminar is directed to give more advanced insight in different issues for the persons running trainings, competitions and/or forming federation's/clubs or planning to form one. The coaching course is meant for persons with an already existing coaching experience on either as a club and/or a playing coaches and persons interested in coach instructing on a higher level and the refereeing part is for persons refereeing and responsible for referee education, nomination and observing.

The course consists of a combination of theoretical lectures, practical training sessions, group works and hand-on training and match observation during three days.
